WHY WE BUILT THIS

The supplier list OTAs use to **decide who to source from.**

No single hotel supplier wins everywhere. The right inventory mix, often several suppliers, is the difference between competitive rates and lost bookings. But evaluating suppliers one by one is slow, and integrating each takes months.

This directory is the shortcut. After pre-integrating **100+ suppliers** for OTAs, agencies and TMCs, we put the practical picture in one place: who's strong in which region, what type of supplier they are, and how to connect them all through a single API.

The shortcut. Every supplier in this directory is already pre-integrated with ZentrumHub. You connect once, then switch any supplier on as a configuration step, not a new development project.

THE MATH OF DOING IT YOURSELF

More suppliers, **without the maintenance tax.**

Each supplier you integrate directly is six workflows (content, search, pre-book, book, cancel, reconcile), none of which standardize across vendors. Multiply that by every supplier in this directory and the cost is enormous.

Integrate once

Connect to ZentrumHub a single time. Adding the 2nd or the 50th supplier takes days, with zero new integration code from your team.

Clean, deduplicated inventory

The same hotel from many suppliers is merged into one record, built from 30M+ daily API calls, so duplicates never reach your booking flow.

We absorb the maintenance

When a supplier changes its auth or endpoints, we update once. Every customer keeps working. Your team never sees the fire.

Under 500ms, 99.99% uptime

One unified data model standardizes every supplier response with industry-leading speed and reliability.

TravClan grew 4x in daily bookings after switching to ZentrumHub, not by hiring more developers, but because their developers stopped fighting integrations.

Tell us where you sell. We'll map your supplier stack.

Send us your current and planned regions. Our team will come back with the suppliers worth connecting, the coverage gaps to close, and how fast you can be live.

01

Free 15-min sourcing call

A no-pitch conversation about your inventory goals and the right supplier mix for your markets.

02

API sandbox access

Test suppliers through one unified API. An API key and the data you need, no demo required.
